

## The Table

9) Need: All 3 boards (A,B,A). The boards all have pre-drilled holes in their underside along the edges. On a clean or protected surface, lay the boards upside down with the smaller board in the middle. Line up the holes on the middle board (B) with the holes on the two side boards A (fig 14)

10) Need: The boards (A,B,A), 6 hinges (D), 36 screws (E), Phillips head screwdriver (M) Leg Clamps

Place the hinges over the holes (fig 14). Make sure that the bump on the hinges is facing up - otherwise you will not be able to fold your table correctly (fig 15). Screw in each hinge to the boards, making sure that each hinge has 6 screws. Tighten securely but do not over-tighten. Take the (M) Leg Clamps and screw them into the centers of the (A) side boards as shown in Fig.14.

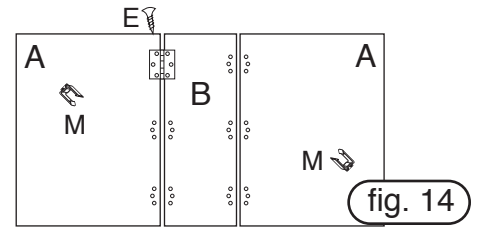

fig. 14

There are six pre-drilled holes in the middle board (B). Flip metal base assembly upside down, line up holes (fig 16). Attach the metal assembly to the middle board (B) with the Pan-Head screws (F). Again, tighten securely but do not over tighten.

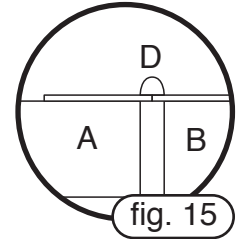

fig. 15

12) Fold in the wing supports (L) and the two side boards (A) and hold tight as you turn the table right side up.

13) Drawers may now be inserted.

### GENERAL USE

Check the locked casters. If the small tab is up, then the casters are free to move. The casters are locked if the tab is down (fig. 17a). Be sure that the casters are locked when the table is in use. However, do not move the table if the casters are locked, as this may damage them.

To keep the side boards in place, carefully raise one side and then swing out the metal wing support underneath. The end of the support should be placed in the center of the side board - this will give the table and the side maximum balance and stability.

For minor adjustments to table or wing height, you can rotate the nut on the casters to increase the height of a certain section. (fig. 17b) Simply take a caster, rotate the nut up slightly, and screw back into table leg.

### SAFETY & MAINTENANCE

This table is not a toy - do not let children play on, under, or around it. Do not place more than 30 pounds on the table wings. To clean the table, use a cloth or sponge with mild soap. (Never use anything abrasive). Never rest a hot iron directly on the surface.

For ironing, use the **Home Hobby Table Ironing Cover** - in stores everywhere.
