- NARROW RIBBON e.g. item 56924 for a small bow
- RIBBON 15MM e.g. item 58599 – any patterned ribbon from our vast ranges

### INSTRUCTIONS

#### FAVOUR BAG BUNNY

- Fill your favour bag to however fat you want your bunny to be and tie the bag off with a pretty ribbon bow. I used a pink zigzag but we have many alternatives
- From the template provided cut out a set of ears, feet and hands (ASSEMBLE the EARS and FEET i.e. STICK the pink inner STICKO ear to the white felt ear piece and the pink STICKO foot PIECE to the white felt foot piece)
- Put your double-sided foot pink side down and hot glue your filled lolly bag to the white foot piece (this makes for a more solid foot stand for your bunny)
- Hot glue a large pom-pom to the back to make your bunny tail (glue it low and the tail will help to rest the bunny so he is more stable)
- About a third of the way down the sides of the filled bag, attach the hands on opposite sides to each other.
- The BUNNY HEAD is made from a medium egg (item 49951)

- Turn your egg pointy side down. Onto the back at the top of the rounded part of the egg hot glue your ears
- Now we can give him a face. Glue two medium size stick-on joggle eyes to his face (item 49025); and hot glue a small pink pom-pom on for his nose.
- With a fine black pen draw in the bunny's mouth and teeth
- FINAL step ... open out the top of the tied up favour bag so the egg will fit in. Drop some hot glue into what is now the neck and sit the pointy end of the egg into the glue. Your bunny now complete. Although you can jazz him up a bit with some buttons down the front of his tummy using more of the small coloured pom-poms from pastel mix.

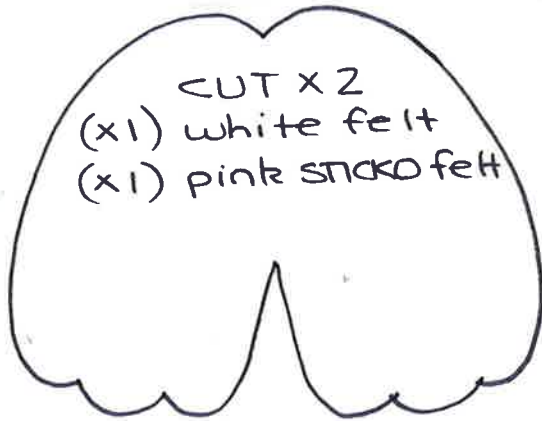

### EGG BUNNIES (one large / one small)

- From the template provided cut out the appropriate ears, feet and face pieces for our bunny pair (ASSEMBLE the EARS and FEET i.e. STICK the pink inner STICKO ears to the white felt ear piece (one large set/one small set) and the pink STICKO foot PIECE to the white felt foot piece)
- Using a paint brush cover your eggs in glue and dip into white glitter (OPTIONAL as the egg is already white)
- Hot glue the fat part of the eggs (the bottoms) to their foot pieces (these are the same size)
- Hot glue a large white pom-pom to the bottom of the large egg and a medium pom-pom to the smaller egg bottom. Remember if you glue them low enough they can act as a stabiliser to keep you egg from falling over.
- Hot glue the large ear piece to the back of the big bunny head and the smaller ear piece to the back of the smaller bunny's head
- Now turn our friend around and give them some faces. Stick-on eyes first. Medium pair for large bunny and smaller pair for small bunny
- Peel paper off their appropriate face pieces and stick them on
- Now just the whiskers to go. Cut up a thin pink chenille stick into ten pieces.
- Stick three whiskers into big bunny's face either side of his nose and two whiskers either side of small bunny
- FINALLY dress them up with a small bow hot glued to the top of the head between the ears (you can use ribbon or even a thin chenille stick makes a pretty bow)
